How does it work?

The 'HyperKnee Extension' is an easy to assemble and portable knee rehabilitation device useful to safely recover a lacking knee terminal extension.

Full knee extension is critical to walk, properly load both knees following traumas or surgery, and to protect knees from the future onset of knee osteoarthritis.

Regaining full knee extension is sometimes not possible just with physical therapy. Assist your rehabilitation journey with a safe, beneficial, and dedicated tool.

How can you get it

Discuss with your clinicians the benefit of including the 'HyperKnee Extension' device into your rehabilitation pathway.

Email us to rent or purchase your device, as it best fits for your case. We ship worldwide.

Right away

Do not wait to regain knee extension, recur to a dedicated device.

Vital regain

Recovering full extension is pivotal for a knee in the short/mid/long term.

No surgery

Avoid surgical procedures by using an effective non-surgical approach.

The 'HyperKnee Extension' device obtained the **CE certification/marketing for medical devices**
