How does it work?

The 'HyperKnee Flexion' is a knee rehabilitation device useful to safely recover the missing knee flexion.

Regaining knee flexion is pivotal to climb stairs, avoid stumbling, be able to resume functional activities, and to protect knees from the future onset of knee osteoarthritis.

The 'HyperKnee Flexion' assists your rehabilitation journey with a safe, beneficial, and dedicated tool to favor the recovery of a functional flexion of the knee joint.

How can you get it

Discuss with your clinicians the benefit of including the 'HyperKnee Flexion' device into your rehabilitation pathway.

Whether you are a patient or physical therapy provider, email us to purchase your unit. We ship worldwide.

Right away

Do not wait to regain knee flexion, recur to a dedicated device.

Vital regain

Recovering full flexion is pivotal for a knee in the short/mid/long term.

No surgery

Avoid surgical procedures by using an effective non-surgical approach.

The 'HyperKnee Flexion' device obtained the **CE certification/marketing for medical devices**
